Description

GigE Vision camera featuring the Sony IMX273 CMOS sensor

Manta G-158 is a 1.58 Megapixel machine vision camera with a GigE compliant Gigabit Ethernet interface and Hirose port. Manta G-158 incorporates the high quality Type 1/2.9 (6.3 mm diagonal) Sony IMX273 CMOS sensor with Pregius global shutter technology. The Sony IMX273 CMOS sensor provides high frame rates with excellent picture quality. The Manta G-158 is offered in monochrome and color models. At full resolution, this camera achieves 75.3 frames per second. With a smaller region of interest, higher frame rates are possible. The Manta G-158 is an ideal replacement for legacy CCD models.

Manta is one of Allied Vision's versatile GigE Vision cameras with a wide range of features. Particular highlights are the three look-up tables, sophisticated color correction capabilities, a robust metal housing, and many modular options. By default monochrome models ship with protection glass B 270 (ASG) and color models ship with an IRC Hoya C-5000 IR cut filter.

Benefits and features:

- Monochrome (G-158B) and color (G-158C) models
- GigE Vision interface with Power over Ethernet option
- Screw mount RJ45 Ethernet connector for industrial environments
- Supports cable lengths up to 100 meters (CAT-5e or CAT-6)
- Trigger over Ethernet (ToE) Action Commands allow for a single cable solution
- Standard M3 mounting holes on top and bottom of housing
- Support for popular third party image-processing libraries including Cognex VisionPro, MathWorks MATLAB, and National Instruments LabVIEW

Options:

- Power over Ethernet (PoE)
- Available with CS-Mount or CS-Mount with M12-Mount adapter
- Available with Protection glass B 270 (ASG), IRC type Jenofilt 217 (IR cut filter), IRC Hoya C-5000 (IR cut filter), IRP RG715 (IR pass filter), IRP RG830 (IR pass filter)
- Available with various angled head housings or board level version
- Available with white medical design
