

Piranha XL Color 16K

Multi-line CMOS TDI Camera

Multi-line CMOS Color TDI camera delivering breakthrough performance

Teledyne DALSA presents our latest multi-line CMOS color camera, delivering an unprecedented combination of speed and responsivity with low noise and in color. Each color uses four rows, resulting in an unprecedentedly responsive tri-color operation with no color interpolation.

The camera uses the Camera Link HS interface based on Teledyne DALSA's field-proven HS Link technology. It delivers very high data throughput with long transmission distances and reliability. The camera, combined with the XTium Camera Link HS frame grabber, offers a complete solution for the next generation Automatic Optical Inspection.
