Overview

Small compact GigE Vision camera with uncompromised image quality.

The Genie TS-C2500 uses a Teledyne DALSA CMOS, color sensor with a resolution of 2560 x 2048. Teledyne DALSA’s proprietary sensor technology allows for image capture rates of 29 fps in 5M pixels resolution while maintaining exceptional image quality. The Genie TS-C2500 takes advantage of gigabit Ethernet technology, transmitting data over standard CAT-5e and CAT-6 cables to distances of up to 100 m. Like all Genie cameras, the TS-C2500 is based on AIA (Automated Imaging Association) GigE Vision Standard to directly link the camera to a PC.
